NORTHWIND LOGISTICS

MEMORANDUM

To: All regional warehouse managers
From: Dana Whitfield, Operations Manager
Date: March 3, 2025
Subject: Quarterly scanning audit

As part of our ongoing effort to reduce paper handling, every warehouse will complete a scanning audit before the end of the quarter. The audit confirms that delivery notes, customs declarations and signed receipts are digitized within two business days of arrival.

Please review the attached checklist with your team. Each site should nominate one coordinator who will collect the scanned files, verify that every page is legible and upload the batch to the shared archive. Pages that are skewed, cropped or too dark must be scanned again.

The results will be discussed at the regional meeting on April 14. Sites that complete the audit early will receive additional document scanners for the next fiscal year.

AUDIT CHECKLIST

1. Count the delivery notes received during the audit week.
2. Scan each note at 300 dots per inch in grayscale.
3. Check that the reference number is readable on every page.
4. Store the originals in the archive room for ninety days.
5. Report the total number of pages to the regional office.

Questions about the audit can be sent to the operations desk at extension 4471. Thank you for your cooperation and for helping us build a faster, paperless process.

Sincerely,

Dana Whitfield
Operations Manager, Northwind Logistics
